

Part No. ALL30050-30054
ALL30320-30326

Plastic Tank Radiators

Uniquely designed plastic tank radiators with aluminum core offer over 22% weight savings to comparable aluminum tank radiators when filled with coolant. These performance radiators also provide 6% better cooling than aluminum tank radiators. Tanks are fastened to the core with multi-clamps and an o-ring gasket, a process similar in design to many of today's high performance late model muscle cars. Corrosion resistant tanks have molded in 1-1/2" inlet and 1-3/4" beaded hose outlets. Widths are overall including tanks.

Single Pass

ALL30056.....	GM 19" x 24"
ALL30057.....	GM 19" x 26"
ALL30058.....	GM 19" x 28"
ALL30059.....	GM 19" x 31"

- **Lightweight Design**
- **22% Weight Savings**
- **6% Better Cooling**
- **Corrosion Resistant**

GM
Dual Pass

For use with radiator caps to up 22 PSI.

****Not recommended for use with higher pressure caps****
