

**Part No.      ALL72150  
                     ALL72152**

## **Tail Shaft Seal And Bushing**

The tail shaft bushing is a regular wear item, located inside the transmission tailshaft housing. It should be replaced when replacing a tailshaft seal or when a driveshaft failure has occurred. A worn bushing will cause excessive side-to-side movement of the slip yoke and create a vibration or leak. Bushing and seal fit GM Powerglide, Turbo 350, Saginaw, Muncie, Bert and Brinn transmissions.
